Structure & Hardware
Powdercoat Finishes

Parasoleil's award-winning proprietary powdercoat finishes for hardware and structures are made with a zinc primer followed by a powdercoat finish.

FINISHES

Graftone™

Our most popular hardware and frame finish, this versatile brown accent is an ideal color to place alongside any of our brown based panel finishes. It has the unique ability to “melt” away behind the panel finish while drawing almost no attention to itself.

Nimbus™

Deriving it's name from the cloudy skies, this matte grey finish holds up nicely against any of our silver based finishes, and is the perfect accent for the bold green or orange of some of our Patina Powdercoats.

Raven™

The quintessential understatement color – subtle as well as slimming. This matte black finish can be used with any and all of our panel finishes, the choice is yours. If you are looking to make your hardware truly disappear, then this is the finish for you.

WARRANTY

Parasoleil warrants all hardware assemblies to be free from defects in workmanship and materials, under normal use and conditions, for a period of one (1) year for the original invoice date. This warranty covers assembly of hardware components as well as standard color finish application and adhesion, and does not apply to custom finished hardware.
